

Secure Track Solutions – Vehicle Security Checklist

Vehicle theft is becoming increasingly sophisticated, so relying solely on your vehicle's factory security may not provide the level of protection you need. Simple precautions combined with multiple layers of security can significantly reduce your risk. Keep your keys secure, protect keyless vehicles from signal-based attacks, park in secure and well-lit areas, and consider additional protection such as immobilisers, trackers, and CCTV. Taking a proactive approach to vehicle security can help deter criminals, prevent unauthorised use, and support recovery if the worst happens.

- ☐ Keep keys secure and away from doors and windows
- ☐ Use a tested Faraday pouch for keyless vehicles
- ☐ Check whether your key has a sleep/deactivation function
- ☐ Keep vehicle software and security updates up to date
- ☐ Always check the vehicle is locked before walking away
- ☐ Park in well-lit, secure areas where possible
- ☐ Remove valuables from the vehicle when unattended
- ☐ Consider additional physical security where appropriate
- ☐ Fit an additional immobiliser for enhanced protection
- ☐ Install a tracker to support vehicle recovery
- ☐ Consider CCTV to monitor your driveway or parking area
- ☐ Regularly review your vehicle's security and potential vulnerabilities

Immobilisers & Trackers

An immobiliser adds an additional layer of protection by preventing the vehicle from being driven away without the correct authorisation, even if a thief gains entry or has access to the vehicle's key. A tracker provides an additional recovery layer by helping locate the vehicle if it is stolen. Used together, they create a stronger security system designed to help prevent theft and improve the chances of recovering the vehicle if a theft occurs.

CCTV — Deter, Detect & Provide Evidence

A professionally installed CCTV system adds another valuable layer to your vehicle and property security. Clearly positioned cameras can act as a visible deterrent, while recorded footage can provide valuable supporting evidence if suspicious activity, attempted theft or vehicle theft occurs. With the right camera placement and coverage, CCTV helps you monitor and protect your driveway, property, and vehicles around the clock.

Protect Your Vehicle with STS

Every vehicle and owner has different security needs. Secure Track Solutions can assess your vehicle, identify potential vulnerabilities and recommend security solutions suited to your individual requirements. From immobilisers and trackers to additional vehicle security, get in touch with STS today and take the next step towards protecting what matters most.

Security They Can't See. Protection They Can't Beat.
